

# KS2 - Maths Parent Workshop

 **Fox**Federation

Nick Marsh - Maths lead

# What we will cover today

- How we teach maths at Fox
- Key concepts covered in Key Stage 2
- How you can support home

What is teaching for *Mastery*?

 **Fox**Federation

# What does it mean to Master something?

- I know how to do it
- It becomes automatic and I don't need to think about it  
e.g. driving a car
- I'm really good at doing it
- I understand what I am doing
- I can show someone else how to do it.

# What is teaching for mastery?

Teach less but teach it better

Go slow to go fast

Go deep to build firm foundations - depth is simplicity, not complexity, so accessible for all

Whole class teaching - to maximise teacher input with additional pre-teaching/intervention for those who need it.

# Revisiting key concepts throughout our curriculum

## Year 3

	Unit	Unit name
Autumn 1	1	Adding and subtracting across 10
	2	Numbers to 1,000
Autumn 2		
Spring 1	3	Right angles
	4	Manipulating the additive relationship and securing mental calculation
Spring 2	5	Column addition
	6	2, 4, 8 times tables
	7	Column subtraction
Summer 1	8	Unit fractions
Summer 2	9	Non-unit fractions
	10	Parallel and perpendicular sides in polygons
	11	Time

# Revisiting key concepts throughout our curriculum

## Year 4

	Unit	Unit name
Autumn 1	1	Review of column addition and subtraction
	2	Numbers to 10,000
	3	Perimeter
Autumn 2	4	3, 6, 9 times tables
	5	7 times table and patterns
Spring 1	6	Understanding and manipulating multiplicative relationships
	7	Coordinates
Summer 1	8	Review of fractions
	9	Fractions greater than 1
Summer 2	10	Symmetry in 2D shapes
	11	Time
	12	Division with remainders

# Revisiting key concepts throughout our curriculum

## Year 5

	Unit	Unit name
Autumn 1		
	1	Decimal fractions
	2	Money
Autumn 2	3	Negative numbers
	4	Short multiplication and short division
Spring 1	5	Area and scaling
Spring 2	6	Calculating with decimal fractions
	7	Factors, multiples and primes
Summer 1	8	Fractions
Summer 2	9	Converting units
	10	Angles

- Number and place value
- Number facts
- Addition and subtraction
- Multiplication and division
- Geometry
- Other

# Revisiting key concepts throughout our curriculum

## Year 6

	Unit	Unit name
Autumn 1	1	Calculating using knowledge of structures (1)
	2	Multiples of 1,000
Autumn 2	3	Numbers up to 10,000,000
	4	Draw, compose and decompose shapes
Spring 1	5	Multiplication and division
	6	Area, perimeter, position and direction
Spring 2	7	Fractions and percentages
	8	Statistics
Summer 1		KS2 tests
Summer 2	9	Ratio and proportion
	10	Calculating using knowledge of structures (2)
	11	Solving problems with two unknowns
	12	Order of operations
	13	Mean average

- Number and place value
- Number facts
- Addition and subtraction
- Multiplication and division
- Geometry
- Other

# Revisiting key concepts throughout our curriculum

# How do we teach Maths at Fox?

 **Fox**Federation

The children have 5 one hour Maths lessons per week.

We use a range of strategies, representations and resources to help children improve their understanding and mathematical structures.

# Concrete > Pictorial > Abstract

If children play with mathematical objects before they are asked to solve problems with them, they are more successful and more creative.

# Representations - Concrete

# Representations - Pictorial

# Abstract

<b>+</b>	<b>-</b>	<b>×</b>
<b>÷</b>	<b>=</b>	<b>≥</b>
<b>≤</b>	<b>()</b>	<b>√</b>

$$3 + 5 + 7$$

●		●		●	●
●		●		●	●

$$3 + 5 + 7 = 5 + 10$$

		●		●	
		●		●	

$$3 + 5 + 7$$

# Going deep to build firm foundations

$$18 \times 5 = 90$$

Francesco

$5 \times 20 = 100$   
 $2 \times 5 = 10$   
 $100 - 10 = 90$

Victor  
 $12 \times 5 = 60$   
 $6 \times 5 = 30$   
 $60 + 30 = 90$

Elgiz  
 $18 \times 10 = 180$   
 $180 \div 2 = 90$

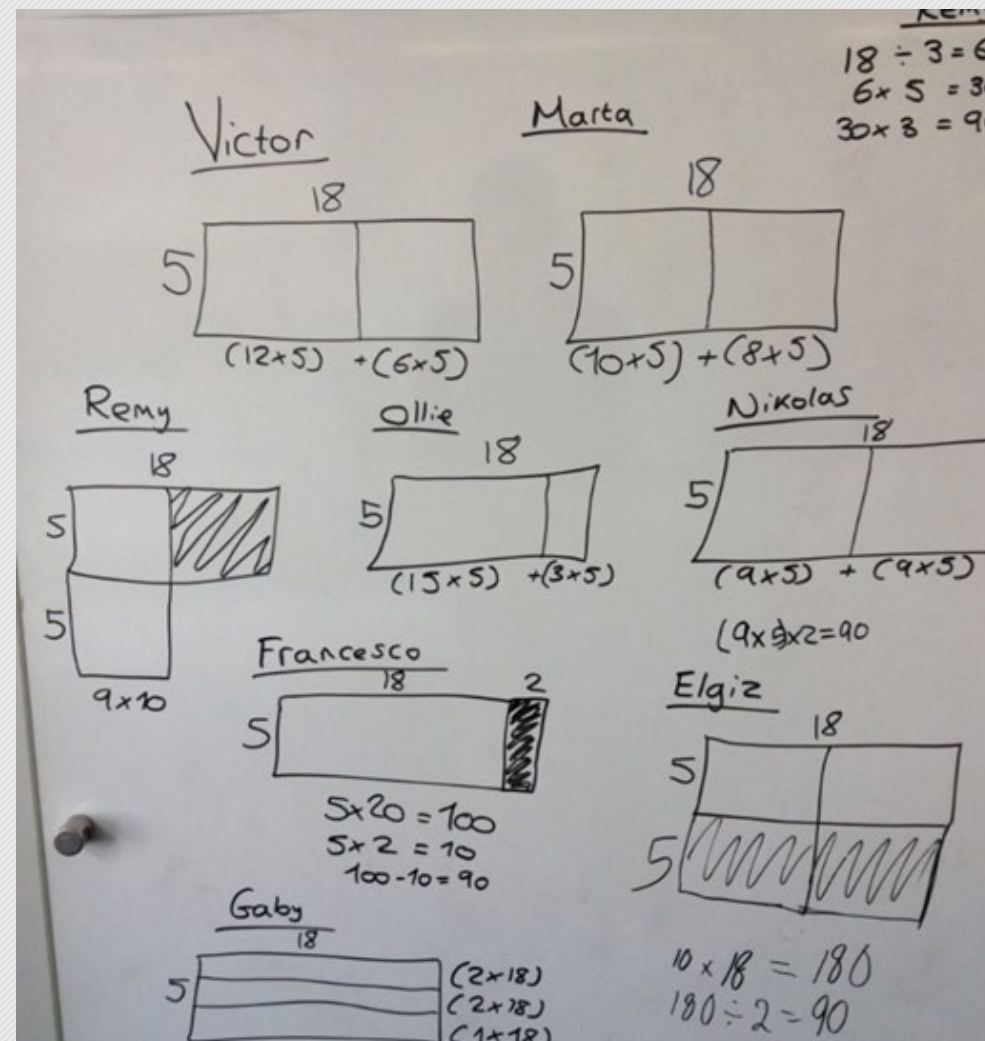

Gaby  
 $18 \times 2 = 36$   
 $18 \times 2 = 36$   
 $18 \times 1 = 18$   
 $36 + 36 + 18 = 90$

Marta  
 $10 \times 5 = 50$   
 $8 \times 5 = 40$   
 $50 + 40 = 90$

Nikolas  
 $9 \times 5 = 45$   
 $9 \times 5 = 45$   
 $45 + 45 = 90$

Remy  
 $18 \div 2 = 9$   
 $9 \times 10 = 90$

Ollie  
 $5 \times 15 = 75$   
 $(5 \times 3) \times 5 = 75$   
 $5 \times 3 = 15$   
 $75 + 15 = 90$

# How do we teach maths?

There is a great emphasis on speaking and listening

- Vocabulary
- Questioning
- Mathematical Vocabulary
- Reasoning and explanation
- Pushing the children to answer in full sentences with sentence scaffolds.

This is an essential part of children showing they have mastered a concept.  
Can they explain their understanding.

# Reasoning

Spot the mistake

$$0.23 + 1.62 = 3.92$$

$$\begin{array}{r} .23 \\ + 1.62 \\ \hline 3.92 \end{array}$$

This question is a little more tricky.  
Can you work out why?

$$1.36 + 1.68 = \underline{\hspace{2cm}}$$

# LO : To explain the relationship between multiples of three and multiples of six

$0 \times 3 = 0$	$0 \times 6 = 0$
$1 \times 3 = 3$	$1 \times 6 = 6$
$2 \times 3 = 6$	$2 \times 6 = 12$
$3 \times 3 = 9$	$3 \times 6 = 18$
$4 \times 3 = 12$	$4 \times 6 = 24$
$5 \times 3 = 15$	$5 \times 6 = 30$
$6 \times 3 = 18$	$6 \times 6 = 36$
$7 \times 3 = 21$	$7 \times 6 = 42$
$8 \times 3 = 24$	$8 \times 6 = 48$
$9 \times 3 = 27$	$9 \times 6 = 54$
$10 \times 3 = 30$	$10 \times 6 = 60$
$11 \times 3 = 33$	$11 \times 6 = 66$
$12 \times 3 = 36$	$12 \times 6 = 72$

What's the same and what is different about the three and six times table?

# Fluency - Key facts in Key Stage 2

 **Fox**Federation

# How do we teach maths?

Fluency forms a key part of our teaching...but fluency is not just about speed. It is about being **efficient, flexible and accurate**.

**Mastery of times tables is a key focus of Key Stage 2.**

Times Table - 12x12													144 facts
	1	2	3	4	5	6	7	8	9	10	11	12	
1	1	2	3	4	5	6	7	8	9	10	11	12	
2	2	4	6	8	10	12	14	16	18	20	22	24	
3	3	6	9	12	15	18	21	24	27	30	33	36	
4	4	8	12	16	20	24	28	32	36	40	44	48	
5	5	10	15	20	25	30	35	40	45	50	55	60	
6	6	12	18	24	30	36	42	48	54	60	66	72	
7	7	14	21	28	35	42	49	56	63	70	77	84	
8	8	16	24	32	40	48	56	64	72	80	88	96	
9	9	18	27	36	45	54	63	72	81	90	99	108	
10	10	20	30	40	50	60	70	80	90	100	110	120	
11	11	22	33	44	55	66	77	88	99	110	121	132	
12	12	24	36	48	60	72	84	96	108	120	132	144	

- Memorising facts
- Using and applying these facts.
- Making patterns and connections.
- Understanding mathematical laws.

# Facts that children need to master

## Times tables

Times Tables 1 to 12			
1 times table	2 times table	3 times table	4 times table
1 x 1 = 1	1 x 2 = 2	1 x 3 = 3	1 x 4 = 4
2 x 1 = 2	2 x 2 = 4	2 x 3 = 6	2 x 4 = 8
3 x 1 = 3	3 x 2 = 6	3 x 3 = 9	3 x 4 = 12

12 x 1 = 12	12 x 2 = 24	12 x 3 = 36	12 x 4 = 48
5 times table	6 times table	7 times table	8 times table
1 x 5 = 5	1 x 6 = 6	1 x 7 = 7	1 x 8 = 8
2 x 5 = 10	2 x 6 = 12	2 x 7 = 14	2 x 8 = 16
3 x 5 = 15	3 x 6 = 18	3 x 7 = 21	3 x 8 = 24
4 x 5 = 20	4 x 6 = 24	4 x 7 = 28	4 x 8 = 32
5 x 5 = 25	5 x 6 = 30	5 x 7 = 35	5 x 8 = 40
6 x 5 = 30	6 x 6 = 36	6 x 7 = 42	6 x 8 = 48
7 x 5 = 35	7 x 6 = 42	7 x 7 = 49	7 x 8 = 56
8 x 5 = 40	8 x 6 = 48	8 x 7 = 56	8 x 8 = 64
9 x 5 = 45	9 x 6 = 54	9 x 7 = 63	9 x 8 = 72
10 x 5 = 50	10 x 6 = 60	10 x 7 = 70	10 x 8 = 80
11 x 5 = 55	11 x 6 = 66	11 x 7 = 77	11 x 8 = 88
12 x 5 = 60	12 x 6 = 72	12 x 7 = 84	12 x 8 = 96
9 times table	10 times table	11 times table	12 times table
1 x 9 = 9	1 x 10 = 10	1 x 11 = 11	1 x 12 = 12
2 x 9 = 18	2 x 10 = 20	2 x 11 = 22	2 x 12 = 24
3 x 9 = 27	3 x 10 = 30	3 x 11 = 33	3 x 12 = 36
4 x 9 = 36	4 x 10 = 40	4 x 11 = 44	4 x 12 = 48
5 x 9 = 45	5 x 10 = 50	5 x 11 = 55	5 x 12 = 60
6 x 9 = 54	6 x 10 = 60	6 x 11 = 66	6 x 12 = 72
7 x 9 = 63	7 x 10 = 70	7 x 11 = 77	7 x 12 = 84
8 x 9 = 72	8 x 10 = 80	8 x 11 = 88	8 x 12 = 96
9 x 9 = 81	9 x 10 = 90	9 x 11 = 99	9 x 12 = 108
10 x 9 = 90	10 x 10 = 100	10 x 11 = 110	10 x 12 = 120
11 x 9 = 99	11 x 10 = 110	11 x 11 = 121	11 x 12 = 132
12 x 9 = 108	12 x 10 = 120	12 x 11 = 132	12 x 12 = 144

- Asking children to 'memorise' all of these facts will lead to cognitive overload.
- Children are unlikely to retain all this information.

# How many facts do children have to learn?

Times Table - 12x12													144 facts
	1	2	3	4	5	6	7	8	9	10	11	12

$$6 \times 4 = 24$$

# Fluency of times tables

For embedded and deep learning of times tables they need to be more than rote learnt. This true fluency of number facts should be done through making connections between facts, spotting patterns alongside traditional conventional ways of teaching times tables.

LO : To explain the relationship between multiples of three and multiples of six

factor    product

What did you notice when we were all skip counting?

Number	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24
Counting in 3s	✓			✓			✓			✓			✓			✓			✓			✓			✓
Counting in 6s	✓						✓						✓						✓						✓

All of the numbers said by the sixes group are also said by the threes group.

Not all of the numbers said by the threes group are also said by the sixes group.

For every number said by the sixes group, the threes group says two numbers.

LO : To explain the relationship between multiples of three and multiples of six

For every 1 group of six, there are 2 groups of three.

# LO : To explain the relationship between multiples of three and multiples of six

$0 \times 3 = 0$	$0 \times 6 = 0$
$1 \times 3 = 3$	$1 \times 6 = 6$
$2 \times 3 = 6$	$2 \times 6 = 12$
$3 \times 3 = 9$	$3 \times 6 = 18$
$4 \times 3 = 12$	$4 \times 6 = 24$

Products in the six times table are also in the three times table

Fill in the missing numbers

factor

product

0	$\times 3 =$	0	$= 6 \times$	0
2	$\times 3 =$	6	$= 6 \times$	1
4	$\times 3 =$	1	$= 6 \times$	2
6	$\times 3 =$	2	$= 6 \times$	3
8	$\times 3 =$	3	$= 6 \times$	4
10	$\times 3 =$	4	$= 6 \times$	5
12	$\times 3 =$	5	$= 6 \times$	6

What do you notice about the product of an even number and three?

**The product of an even number and three is a product in the six times table.**

# Fluency progression in times tables

Year 2 - 2, 5 and 10s

Year 3 - 2, 4 and 8s

Year 4 - 3, 6 and 9...7...11 & 12

commutative

$$4 \times 6 = 24$$

$$6 \times 4 = 24$$

We are striving that only 6 facts have to be taught once the 3, 6 and 9 times tables have been taught.

# Year 4 Multiplication Tables Check

- The purpose of the MTC is to determine whether Year 4 pupils can recall their multiplication tables up to 12x12 fluently as outlined in the National Curriculum
- Takes place in June

# What will it be like?

- On screen check of 25 questions (computer/ipad).
- Your child will be able to answer 3 practice questions before taking the actual check.
- 6 seconds to answer each questions.
- It will take at most 5 minutes to complete.

Timed practice through Sumdog. Can set the time to a longer amount and work your way down.

Key representation - tens frame

=  \_\_\_\_\_ tenths are equivalent to one \_\_\_\_\_.

Supporting at home

 **Fox**Federation

# How can you help?

Maths skills can be developed at home by involving children in everyday activities such as baking or calculating time. This also develops their problem solving and reasoning skills!

Don't underestimate yourself, or the power you have as a parent getting involved in your child's learning!

# How can you help?

## Positive mindset is very important!

You may find yourself from time to time saying ‘I was never good at Maths.’

Children will pick up and mirror this energy. We would advise parents to use positive language such as ‘It’s fine to make mistakes, we all do’ or ‘It’s ok that you find this tricky, let’s look through it together.’

Positivity can go a long way to improving their attitude towards Maths!

# How can you support fluency at home?

Lots of practise at home!

$$12 \times 3 =$$

# How can you support fluency at home?

Children are very good at practising certain things until they have mastered them. If they see it as meaningful, they will pay it the necessary attention...

## Counter game

This is a game for two players. Each player has three counters, each set a different colour. Players choose to be red or blue and place one counter on each of their colours. Players take it in turns to move a counter by sliding it into an adjacent space or by jumping over their opponent's counter into an empty space. When a player lands on a calculation he/she must read and complete the calculation. The winner is the first player to get all three of his/her counters in a straight line.

# How can you support fluency at home?

## Times tables can be fun!

The Funkey Maths cards come with full instructions: advice on how to start learning times tables, and ideas of fun maths games for primary school kids. Kids love playing with the Funkey Maths cards and they love the games. The whole family can join in. Helping your child succeed in maths really can be sociable and fun!

## Build for the future!

The Funkey Maths cards help children make richer connections between numbers, so they can master multiplication and division facts at the same time. This deepens mathematical understanding and develops the skills and confidence needed for future success in maths.

$$\div$$
$$44 \div 11 = 4$$
$$44 \div 4 = 11$$

$$\times$$
$$4 \times 11 = 44$$
$$11 \times 4 = 44$$

$\frac{10}{10}$	1	$\frac{100}{100}$	1

**Coordinates**

**Coordinate Grid**

**Finding the coordinates of a point.**

**Place Value Columns**

numeral	ten thousands	thousands	hundreds	tens	ones	tenths	hundredths	thousandths
	10,000	1,000	100	10	1	0.1	0.01	0.001

**Quadrilaterals**

**Rectangle**

- Four sides
- Opposite sides parallel
- Opposite sides equal length
- Four right angles

**Parallelogram**

- Four sides
- Opposite sides parallel
- Opposite sides equal
- Opposite angles equal

**Rhombus**

- Four equal sides
- Opposite sides parallel
- Opposite angles equal
- Diagonals intersect at right angles

**Kite**

- Four sides
- Pairs of adjacent sides equal
- Angles where adjacent sides meet are equal
- Diagonals intersect at right angles

**Trapezium**

- Four sides
- One pair of opposite sides are parallel

**Geometry**

**Area of a shape**

**Triangles**

**Equilateral**

- All three sides and angles equal

**Isosceles**

- Two sides and angles equal

**Scalene**

- All three sides and angles of different sizes

**Right-angled**

- A triangle with a right angle. Can be isosceles or scalene.

**Angles**

**Acute Angle**

- 1° to 89°

**Right Angle**

- 90°

**Obtuse Angle**

- 91° to 179°

**Straight Angle**

- 180°

**Reflex Angle**

- 181° to 359°

**Full Turn**

- 360°

**Roman Numerals**

Roman Numeral	Value
I	1
II	2
III	3
IV	4
V	5
VI	6
VII	7
VIII	8
IX	9
X	10
XI	11
XII	12
L	50
C	100
D	500
M	1000

**Multiplication Tables**

x	7	6	12	11
1	7	6	12	11
2	14	12	24	22
3	21	18	36	33
4	28	24	48	44
5	35	30	60	55
6	42	36	72	66
7	49	42	84	77
8	56	48	96	88
9	63	54	108	99
10	70	60	120	110
11	77	66	132	121
12	84	72	144	132

**Year 6 Mathematics Knowledge Organiser**

**Place Value Columns**

ten millions	millions	hundred thousands	ten thousands	thousands	hundreds	tens	ones	tenths	hundredths	thousandths
$1 \times 10^7$	$1 \times 10^6$	$1 \times 10^5$	$1 \times 10^4$	$1 \times 10^3$	$1 \times 10^2$	$1 \times 10^1$	$1 \times 10^0$	$1 \times 10^{-1}$	$1 \times 10^{-2}$	$1 \times 10^{-3}$
10,000,000	1,000,000	100,000	10,000	1,000	100	10	1	0.1	0.01	0.001

**Fraction/Decimal Equivalence**

Fraction	Decimal	Percentage
$\frac{1}{10}$	0.1	10%
$\frac{2}{10}$	0.2	20%
$\frac{3}{10}$	0.3	30%
$\frac{4}{10}$	0.4	40%
$\frac{5}{10}$	0.5	50%
$\frac{6}{10}$	0.6	60%
$\frac{7}{10}$	0.7	70%
$\frac{8}{10}$	0.8	80%
$\frac{9}{10}$	0.9	90%
$\frac{10}{10}$	1	100%

**Fraction, Decimal and Percentage Conversion**

Conversion	Formula	Example
Fractions to Decimals	numerator ÷ denominator	$\frac{1}{4} = 1 \div 4 = 0.25$
Fractions to Percentages	numerator ÷ denominator x 100	$\frac{1}{4} = 1 \div 4 = 0.25$ $0.25 \times 100 = 25\%$
Decimals to Fractions	-write decimal as a fraction over 1 -multiply numerator and denominator by 10 for each decimal digit -simplify	$0.25 = \frac{25}{100} = \frac{1}{4}$
Decimals to Percentages	x 100	$0.25 \times 100 = 25\%$
Percentages to Fractions	-write as a fraction over 100 -simplify	$25\% = \frac{25}{100} = \frac{1}{4}$
Percentages to Decimals	÷ 100	$25\% \div 100 = 0.25$

**Common Conversions**

Unit	Conversion
1 cm	= 10mm
1m	= 100cm = 1000mm
1km	= 1000m
1kg	= 1000g
1l	= 1000ml

**Angles at Intersecting Lines**

**Angles**

Angles	Name	Relationship
a & c b & d e & g f & h	vertically opposite	equal
a & g b & h c & d e & f	corresponding	equal
a & c d & h	alternate exterior	equal
b & f e & g	alternate interior	equal
b & g c & f	consecutive interior	total 180°
a & h d & c	consecutive exterior	total 180°

**Angle Totals**

**Angles on a straight line total 180°**

**Angles in a quadrilateral total 360°**

**Angles in a triangle total 180°**

**Key Formulae**

Formula	Formula
Area of a rectangle	$b \times h$
Area of a triangle	$\frac{1}{2} \times b \times h$
Area of a circle	$\pi \times r^2$

**Cube Numbers**

Cube Number	Value
1³	1
2³	8
3³	27
4³	64
5³	125

**Cube Roots**

Cube Root	Value
³√1	1
³√8	2
³√27	3
³√64	4
³√125	5

**Square Roots**

Square Root	Value
√1	1
√4	2
√9	3
√16	4
√25	5
√36	6
√49	7
√64	8
√81	9
√100	10
√121	11
√144	12
√169	13

**Square Numbers**

Square Number	Value
1²	1
2²	4
3²	9
4²	16
5²	25
6²	36
7²	49
8²	64
9²	81
10²	100
11²	121
12²	144
13²	169

**Multiplication Tables**

x	1	2	4	8	3	6	9	12	5	10	7	11
1	1	2	4	8	3	6	9	12	5	10	7	11
2	2	4	8	16	6	12	18	24	10	20	14	22
3	3	6	12	24	9	18	27	36	15	30	21	33
4	4	8	16	32	12	24	36	48	20	40	28	44

## How can you support maths at home?

### Calculating - Opportunities to discuss multiplication and division facts

- Laying the table - "We each have a knife, a fork and a spoon, but \_\_\_\_ is also coming to dinner, how many pieces of cutlery will now be on the table?"
- Corresponding division facts to multiplication tables.... "There are 4 biscuits - you and share them equally/have them - how many will we get each?"
- Play games which include numbers (card games, memory games like pairs, board games etc.)
- Shoes (other things in pairs) to develop two times tables - "There are 6 pairs of shoes, how many shoes are there altogether?"
- Can also do this for things in other times tables.... "There are 6 people in this room how many fingers are there altogether?"
- Monthly calendar - how many days are left in this month? How many days are left until \_\_\_\_'s birthday?

### Geometry:

- Look for shapes in the home, name them, compare their properties, "I know that's a rectangle because it has two pairs of equal sides".
- Discuss weight/mass through cooking and baking.
- Helping to measure things, family member's heights, discussing whether it would more appropriate to measure things in mm, cm, metres, km
- Talk about positioning/orientation of objects - under, over, on top of, below, next to, opposite to, behind, left to, right to etc. and playing games like Battleships so children have to use positional language.
- Have a monthly calendar to cross off days, discuss today's date.

### How can you support maths in the environment (walking home, in the park and in the shops?)

- So we saw 2 red cars and 3 blue cars. "What percentage of the the cars were blue?"
- "I see four buses, how many wheels are there on those buses altogether?"
- "There are 8 cars parked there. If a quarter of them leave, how many will be left?"
- In shops, show children money, how you are paying. "If I pay with this, how much change will I get?".... "If I paid for this using only 20 pence pieces, how many coins would I need?"
